

Guaranteed Accelerated Improvement

- Raise AYP Scores
- Accelerate RTI Progress
- Close Achievement Gaps

*Your students will enjoy doing math...
and seeing success every day*

iLearn **GAINS** is a comprehensive math intervention program that guarantees accelerated improvement. It includes everything necessary to close achievement gaps, including the iPASS curriculum and a comprehensive, easy-to-manage implementation program. Schools using the program for a full year have experienced exceptionally large gains in math scores on state tests. **We guarantee the results you want or your money back.**

GAINS is based on the recognition that curriculum changes alone will not improve achievement - It takes a concerted effort of dedicated teachers and administrators working together in innovative ways toward a common goal. **GAINS** is a data-driven approach that identifies specific, measurable outcomes and makes it easy to manage all the resources and activities to achieve them.

"We have created a culture of individualized instruction. Teachers analyze their own data, look at benchmarks, and talk about individual student needs. These are professionals doing a professional job." -- Sandy Metts, Instructional Coach

With **GAINS**, we **guarantee** that you will:

- Raise state test scores in math to meet or maintain Adequate Yearly Progress (AYP) for all groups or subgroups;
- Accelerate achievement gains for students targeted for math intervention in a Response to Intervention (RTI) program.

You're held accountable for results. We should be too. That's why we guarantee results.

is the "smart" software that is the heart of the GAINS program. **iPASS** is both a comprehensive curriculum built from state standards and an internet-based instructional delivery and management system. **iPASS** delivers truly differentiated math instruction to all students at the same time, regardless of their abilities – all of this while reducing the teacher's workload.

- First, every student is fully assessed and placed on a course that ensures all learning "gaps" are filled before the student can advance.
- Next, **iPASS** delivers the curriculum and gives the student just the right amount of instruction and practice necessary to understand and retain the concepts being taught.
- Finally, the software keeps track of the results via the internet and provides reports to the teacher immediately upon request.

In brief, it **assesses, prescribes, instructs** and **reports** results. Teachers are freed up to monitor progress and help individual students on a one-on-one basis as needed. It's designed as a supplement to grade-level instruction.

iLearn, Inc., is a company of professional educators. Everything we do is based on solid research in fields related to math education. iLearn, Inc. serves school districts across the country, focusing exclusively on math. For more information, go to www.iLearn.com or call **877-789-2088**.
