

For California Students

iPASS is the state-adopted Math Intervention and Algebra Readiness curriculum from iLearn - but it provides far more than just a textbook. It also includes a comprehensive instructional delivery system for implementing and managing either course of instruction. In short, it **assesses, prescribes, instructs** and **reports**. The bottom line: **iPASS** delivers results in math.

iPASS delivers an individualized program to each student in a class at the same time, regardless of their abilities. It uses technology in an innovative way that makes it much easier to deliver truly differentiated instruction to each student. Here's how:

- 1 Every student is fully assessed to identify specific learning "gaps" and placed on a course that ensures all "gaps" are filled before the student can advance.
- 2 **iPASS** delivers the curriculum and gives the student just the right amount of instruction and practice necessary to understand and retain the concepts being taught. Students cannot proceed without mastering the material at each level.
- 3 The **iPASS** management system keeps track of the results and reports them to the teacher on demand.

It's the closest you can come to a highly-skilled tutor for each student.

"The program [iPASS] doesn't allow them to fail!"

- Doug Wollbrinck, Teacher,
Sacramento Unified School District

What's different?

iPASS:

- Requires that students learn. Students can't guess their way through the program, since it's not based on a multiple-choice format and they must generate their own answers.
- Actually delivers real instruction using engaging graphic animation and natural voice narration
- Is not based on cartoons or a game format; it's real education that engages students.
- Greatly reduces teacher workload by automating time-consuming tasks, such as planning lessons, writing tests or grading papers, which frees up the teacher to work one-on-one with students.
- Improves student morale, which results in fewer student behavior problems.
- Motivates students by allowing them to see success every day, regardless of their abilities.

The bottom line? iPASS delivers results: Accelerated achievement gains for all students.

Your subscription to iPASS includes unlimited, free technical support and 24/7 access to data.

"They're learning things that are directly related to the standardized test. They're improving in their regular math classes, so we're seeing immediate results. It's very structured. It gives a lot of great examples. It's a great tool."

- Richard Noble, Principal, Baldwin Park

Your students will enjoy doing math...and seeing success every day.
